**Macbeth is a 90 minute, immersive fully reimagined audio drama adaptation. It is a 3D audio experience using full-spectrum binaural panning to bring the story to life around the listener. It is best enjoyed with headphones. Because of the international collaboration involved in the creation of this audio drama, the music and soundscape is globally and multi-culturally inspired. It celebrates the timelessness of diversity in its creation and its performance.**

In addition to the feature presentation, there will be a streaming art exhibit during intermission.
